COMING SOON.....OBI REPORTING UPGRADE

OBI Reporting Users,

For the past several months, we have been working on upgrading the OBI Reporting system to the latest version. At this point the public Dashboards and Reports have been tested by the offices that are primarily responsible for the content and we are pleased to announce that the new version will be released on 7/16/2012. To help with the transition, this communication highlights two critical differences between the current and new version of OBI Reporting, Dashboard Navigation and Browser Compatibility.

1. **Dashboard Navigation** - The “look and feel” of the new version is slightly changed. The primary difference is the navigation to dashboards. The new version presents the dashboards in functional area groupings under a “Dashboard” drop down button. Because the dashboards are grouped and use less real estate at the top, the new version is more user-friendly. Below is an illustration of the navigation difference.

   **Current OBI Reporting Navigation**
   
   Dashboard navigation begins by the user selecting the Function Area then the desired report.

   ![Current OBI Reporting Navigation Image]

   **New OBI Reporting Navigation**
   
   Dashboard navigation begins by a user selecting “Dashboards” and then simply moving down to the desired report. The + or – sign next to a report grouping is used to show the underlying reports.

   ![New OBI Reporting Navigation Image]
2. **Browser Compatibility** - Oracle Corporation has certified the following internet browsers for use with the new version of OBI Reporting. Please use one of these when working with the application.

- Internet Explorer (IE) 7.x, 8.x, 9.x
- Firefox 6.x and higher
- Safari 4.x, 5.x
- Chrome 12.x and higher

**Note:** For Internet Explorer (IE) 9.x users please make sure that the “Compatibility View settings” is **Off** (disabled) when using the new version of OBI Reporting.

Additionally, the following 3rd party applications (with versions) are certified for the new version of OBI Reporting:

- Microsoft Office 2003, 2007 (Service Pack 2), and 2010
- Adobe Reader 7.x and higher
- Adobe Flash 10.3 and higher

This information will be helpful when the new OBI Reporting application is deployed on Monday 7/16/2012. Updated Job Aids and new “How to” documents for OBI Reporting will also be available on the OMNI Training website ([http://omni.training.fsu.edu/OMNI-BI-Reporting](http://omni.training.fsu.edu/OMNI-BI-Reporting)) on Monday, 7/16/2012. If you experience other issues after the new application is released, please log an issue in FSU Service Center located at: [http://servicecenter.fsu.edu](http://servicecenter.fsu.edu).
